

Dear Valued Customer,

As the novel coronavirus (COVID-19) continues to spread in the U.S. and across the globe, I want to take a moment to let you know what LightPath is doing to respond to this public health emergency.

First and foremost, LightPath's number one priority is the safety and well-being of our people, clients, families, and the communities in which we live and work. While all our facilities around the world continue to work as usual, including our facility in China that is fully operational, we continue to take precautions to minimize the risks, and have to date no report of illnesses by any employee.

We've assembled a team to monitor the COVID-19 public health emergency and to put measures in place that help ensure both safety for our people and business continuity for our clients.

While our teams had ensured that we have proper supply of all materials and components, given the situation we expect there will be some temporary delays and we are doing everything we can to minimize the impact. We recognize the risk to our production cycles and have activated our contingency plan where needed. This includes sourcing from multiple vendors, redundancy in manufacturing between locations, and communicating daily of any occurrences that might impact our customers.

Please contact us for additional information regarding your account.

Thank you for your understanding and patience as we work thru this difficult situation.

Sam Rubin
President & CEO
